## WORKSHOPS FOR TEACHERS 2016-2017

These workshops are usually customized to the school. We can also come up with a particular topic you might want to address with your teachers.

**Activities:** Theory / Practice      **Includes:** Educational material

 **Building and Leading Effective Classrooms Routines:** How to use the daily routine to maximize the learning time in your classroom. Enhance the routine with strategies, and different types of activities to respond to student's developmental needs.

 **Evaluation Methods and Strategies in Early Childhood Education:** Learn which are the different strategies and methods teachers can use to observe and assess students. How to use observations to develop meaningful lesson plans.

 **Early Literacy Development:** Which are the stages the children go through in the acquisition of Reading and Writing? We will go through the stages of this process and how to favor the development through different activities and strategies. Which are age appropriate errors and which are red flags.

 **The inclusive Classroom:** A useful teacher's guide of strategies to use in the classroom that addresses different needs and promotes inclusion to every child in different parts of the routine. Teachers will get strategies to do early identification and address those challenges within the classroom, following legal and ethic principles as well as learning basic steps to approach help and the family.

 **Parent-teacher Relationship:** How to build the bridge between teachers and parents to promote involvement in the classroom. How to handle different kind of parents while enhancing communication. How to prepare meaningful parent/teacher conferences and Welcome back meetings.

## WORKSHOPS FOR TEACHERS 2016-2017

**Working with ESOL in the classroom:** Learn how teachers can develop strategies to enhance communication with ESOL students and parents. How to assess and encourage learning, and what is research saying about these students. Enrich your classrooms responding to ESOL students as well.

**Addressing Challenging Behaviors in the Classroom:** Incorporate several behavioral management strategies into your classrooms. Learn how can you be a successful teacher with your most challenging students.

**An Overview to the Highscope Curriculum:** Discover the wonderful world that Highscope can bring into your classroom. These workshops are tailor made to the needs of your center. We can prepare a workshop to work in a practical way on lesson plans, environment, routine, or any component related to this curriculum. Some of these workshops are:

- Planning Age Appropriate and Meaningful Classroom Activities
- Adapting the Highscope Daily Routine for Toddlers.
- The Image of the Child and the Highscope Curriculum.
- Using the Message Board in our daily routine.
- Teaching mathematics in early childhood.

## OTHER WORKSHOPS...

**Learning Environment:** How to efficiently arrange, choose, and use classrooms materials and spaces in order to challenge your students.

**Cognitive Development in Early Childhood:** Know what we can expect from our children in early stages, how we can plan activities to develop basic critical thinking skills, and how important these cognitive skills are in further academic challenges.

**Building a “Reading Community”:** Schools can make a difference in building reading habits. There are many creative ways to enhance the passion for reading starting in early stages.

**Positive Discipline:** Learn how teachers’ strategies and a healthy environment can make the difference in maximizing learning time in the classroom and develop socio-emotional skills within their group of students. Positive Discipline helps children take action in resolving day-to-day conflicts.
